Food Inspector Says Maui Was Filthy

(Continued from Page One.)

was found to be spoiled or unfit for human food and destroyed. This included—786 tins of pork and beans (soy), 57 tins fruit products, 216 tins vegetable products, 358 tins fish and meat products, 24 tins miscellaneous (molasses, cheese, milk, ketchup, etc.) 4925 lbs. salt fish (salmon, butter, etc.) 155 lbs. dried fish, 20 lbs. salted vegetables, 297 lbs. vermicelli, crackers, etc.) and 19 lbs. of old candy.

Some Things Found

Among the things which the inspector found and caused to be corrected were—dirty food storerooms, use of newspaper for wrapping merchandise (absolutely forbidden), filthy cupboards, dirty tables and shelves, filthy and roach infested dining tables, use of common drinking cups, dirty meat blocks, dirty napkins and wiping cloths, cat asleep on wrapping paper on bread counter, dark and filthy pantries, ice cream cones exposed to dust and flies, mouse and roach infested food bins and boxes, dirty children where food is handled and sold, soda water cups and spoons improperly cleaned, dilapidated and dirty ice boxes, meat not properly protected from flies, food exposed to dust and dirt, dirty dish towels, sinks, sinkboards, etc.

The inspectors found dealers selling frozen milk as ice cream. The law requires that ice cream must contain at least 14 percent butter-fat, and any below this standard must have a conspicuous sign designating it as "frozen dairy" or some such title.

A keg of grape juice was discovered which was likely to get the dealer in bad with the revenue officers. One baker was giving his cakes a fine egg-yellow color by use of a coloring compound.

CLASS DISTINCTION IN ENGLAND'S SCHOOLS

WEALDSTONE, Eng., Oct. 25.—(By The Associated Press)—The local council here does not approve of Dr. Christopher Addison, Minister of Health, with a salary of \$25,000 a year, sending his daughters to a public secondary school at Harrow where the fees are only \$10 a term.

One councillor stated that he did not consider that people with \$25,000 a year should monopolize the school which was intended for the masses. There was a waiting list of 75.

Dr. Addison replied that he would gladly pay higher fees if the rules permitted and declared that he had as much right as any other citizen to send his children to a public secondary school.

"In my view," he added, "much advantage would accrue if there were less class distinction in our schools."

comments or expressing his own opinions concerning them.

One thing he did say, however, that seemed significant, was that he hoped the day will never come when the people of Hawaii will ask for a commission form of government for the Islands.

Dr. Bunker pointed out that at present 54% of the school children of the territory are of Oriental parentage, and that the language schools practically parallel the public schools. He touched upon the increasing number of voters of Asiatic origin, from Hawaiian born and the 482 admitted to citizenship by the courts on account of their military service under the Stars and Stripes.

By 1930, the speaker said, it is estimated that 28% of the voters of the territory will be of Asiatic parentage, and by 1940, the ratio should be 50%. From that time on the increase will be more and more rapid.

Dr. Frank Scudder, of the Hawaiian Board, Honolulu, who was also present, spoke briefly from the standpoint of his organization on the language schools. The fact that most of these schools are under the control of the Buddhist priests, was, he felt, the most serious objection to them, since the Buddhist teachings do not tend to promote Americanizing of the children.

Mrs. W. C. Crider's piano solo was a pleasant break in the serious matters of the meeting, and was much enjoyed.

A talk by Miss Ida Wood, of the Maunaloa seminary had been scheduled as a part of the program, but owing to the late hour was postponed until the next meeting of the Club.

Reims Cathedral May Be Restored Says Cardinal

PARIS, Nov. 28.—(Associated Press)—After all the Rheims cathedral has not suffered from German bombardments and fire so much as was at first supposed. Cardinal Lucon has told a representative of the Paris Intransigent. The Cardinal announced that divine service would be resumed in the cathedral but the holy office will be restricted to the altar of the Virgin and the ambulatory around it. These will accommodate only about 1,500 persons.

The interviewer describes how he met the cardinal at Rheims in a simply furnished apartment of the archiepiscopal palace, with a shell hole in the wall. Cardinal Lucon, despite his 77 years, is still hale and alert, and he is an optimist.

"Destroyed, my cathedral? Why, no," he said. "The damage is much more easily repairable than is generally believed. A few ancient parts, it is true, cannot be replaced; but the beauty of the cathedral lay, first, in its stained glass; secondly, in its sculptures, and thirdly in its statuary."

"Of the stained glass, nine-tenths has been saved and brought to Paris. The remaining tenth can be restored by specialists, with the aid of much patience and a great number of colored photographs we have. As regards the sculptures, we shall use the numerous moldings we have of them. Many have had to be restored anyway in the course of centuries, such as for instance, the large piece representing the Assumption. That was restored in 1875."

"As for the statuary, we have so many moldings that it will be easy to reproduce the damaged parts. The pillars, with their ornamented capitals have suffered little; only the two side doorways have been badly damaged by fire."

"Was there not some talk of leaving the cathedral as it was?" the reporter asked.

"If the evidences of Teutonic barbarity have to be preserved, let them be kept in a private museum," replied the Cardinal gravely.
